

ABOUT CANCER RESEARCH NETWORK OF IRAN (CRNIR)

Cancer Research Network of I.R. Iran (CRNIR) consists more than 40 Iranian cancers research centers, scientific associations and NGOs. CRNIR has been established in 2003 by the Ministry of Health and Medical Education to promote cancer research through collaborative projects and networking and apply scientific evidence to strengthen the national cancer control program in Iran. CRNIR research focuses on the characteristics of patients, clinicians, communities, and health systems that lead to the best possible outcomes in cancer prevention and care.

CANCER RESEARCH
NETWORK OF IR. IRAN

The CRNIR is mainly funded by the deputy of research of the ministry of health and medical education. The network is allowed to raise research funding from non-governmental organizations and private sectors. The mission of the CRNIR includes:

- To provide scientific evidence for planning and monitoring of the national cancer control program, including studies of prevention, early detection, treatment, survivorship, surveillance, and end-of-life care.
- To determine and disseminate national cancer research priorities
- To promote cancer registration and makes good use of standardized approaches to data collection, data management and analysis across health systems.
- To enhance national and international research collaboration and conduct large, multi-center, multidisciplinary research
- To mobilize resources and raise funding for cancer research
- To enhance research skills through national and international scientific events including workshops and seminars

- Opening Lectures by Representatives from IARC and UICC
- Assembly of Cancer NGOs
- Election of the Boards of Directors of the National Cancer Research Network
- Two-day “*Cancer Research Leadership*” Training Workshop
- Public Awareness Campaign and Celebration of the “*World Cancer Day*”

OVERVIEW OF CONGRESS PROGRAMME

Track 1: Cancer Burden and Risk Factors

1: Cancer Registration

2: Risk Factors

- Smoking
- Dietary Factors
- Alcohol Consumption
- Occupational Carcinogens
- Environmental exposures
- Country Specific Risk Factors (Opium use, water-pipe, animal contact, etc.)
- Obesity and physical activity
- Socioeconomic factors

Track 2: Early Detection and Screening

- Breast cancer
- Cervical cancer
- Colorectal cancer
- Stomach cancer
- Esophageal cancers

Track 3: Carcinogenesis and personalized medicine

- Cancer Genetics
- Biomarkers
- Mathematical Modelling

Track 4: Policy Making and National Program

- Cancer Prevention Legislation
- National Early Detection Plan
- Cancer Research Status and Capacity in Iran
- Non-Governmental Organizations
